

Veterinary Clinical Pathologist – Melbourne/Sydney

Gribbles Veterinary Pathology provides exceptional pathology services in the veterinary and animal care industry across Australia and New Zealand. Gribbles currently employs over 20 veterinary pathologists across the two countries. We pride ourselves in bringing to the market new innovative tests. Recently we have established new Australian laboratories in Queensland, New South Wales and Victoria.

We are seeking a veterinary clinical pathologist, Diplomate of the American College of Veterinary Pathologists (Clinical Pathology) or equivalent, with excellent diagnostic skills. Principle responsibilities for the position include haematology, clinical chemistry and cytology reporting. Gribbles Veterinary pathologists have a close working relationship with medical pathologists collocated on the same site and often discuss cases. You will be part of team who prides themselves in the provision of excellent timely diagnostic test results.

In this role you will be required to provide interpretations of laboratory results to veterinarians and provide scientific support to the laboratory staff. You will oversee validation studies and provide training for scientists and technical staff.

Benefits we offer:

- Variety of caseload including small animals, livestock, zoo animals and wildlife.
- Interaction and a close working relationship with clinical veterinarians and senior laboratory staff.
- Work in a friendly and professional environment

The position will be located in Melbourne or Sydney. This will be determined in consultation with the successful applicant.
