

BVD Bulk Milk Portal

... the smarter way to order your tests

Gribbles Veterinary's Bulk Milk Portal is an exciting new feature that will help reduce the administration load when carrying out bulk milk testing for your farmers.

The bulk milk portal allows for online ordering of bulk milk BVD, ostertagia and liver fluke testing – all performed on dairy company sourced samples. No on-farm sampling required! This includes our economical Herd Guardian packages. This system also provides visibility of all your clinic's orders booked with Gribbles Veterinary for the upcoming season; which farmers are about to be tested in the coming weeks; and whether the sample has been received at the laboratory.

For instructions on accessing and using the portal refer to the How To guides on our [website](#).

Select Package
